Dear Airtable,

This is a letter to express my interest in your Software Engineer role. I have 2 years of professional experience as a developer. I have a passion for developing robust applications, and I feel I would be a perfect candidate for this role.

Building high performance, easy to use, user friendly applications is a passion of mine. It's important to be at the cutting edge of technology, and it's my goal as a developer to hold a growth mindset and continue to develop my skills. At my previous roles I collaborated with team members to come up with news ideas and effective solutions. This combination of work ethic, dependability, and technical skills would allow me to perform exceptionally well at the role.

The requirements you posted for this role align greatly with my experience and expertise. I would like to make a note of a few of them here:

- Strong working knowledge of HTML, CSS, React, and Javascript
- Built backends using NodeJS, Python, MongoDB, and Postgres
- Shipped projects using Heroku, AWS, and Netlify

Please contact me at any time via call or email. Thank you sincerely for both your time and consideration. I look forward to hearing from you.

Thank you,  
Matt Closson
